

Here's what parents and teachers are saying about the Write-On Handwriting Complete Handwriting System . . .

"My first grader has already been complimented by his teacher on how much his handwriting has improved. My 3rd and 5th grader (use Conquering Cursive) about 10 minutes a day and they also have made improvements. My 5th grader has some major problems with handwriting and motor development. I'm excited about his progress because he's had bad habits of writing letters and numbers from bottom to top - now he is improving. I'm shocked at how many students at our school have handwriting problems and how many of them go backwards when forming their letters."

Sylvia, Jones Valley Elementary - Huntsville, AL

"My students use the program during Center Time. All my students have benefited from using Write-On Handwriting products. Write-On Handwriting products provide teachers, tutors and students with consistent language and direction to form letters and numbers correctly and efficiently. The multi-sensory approach allows the students to listen to the language of letter formation while they see the letter formed. Then the students are given opportunities to practice and receive immediate feedback."

Carolyn, Kilgour Elementary School - Cincinnati, OH

"In a team planning meeting, one of our third-grade teachers was raving about Conquering Cursive. She used a laptop and projector to demo the software and the assigned letters for the week with her class. The kids really enjoyed watching their teacher trace the letter with the mouse. Then the kids took turns on their classroom computers as they were doing independent class work and everyone really enjoyed it. The teacher is excited to see how Conquering Cursive improves the kids' writing."

Mara, Pittsburgh Public Schools - Pittsburgh, PA

I was able to see improvements in the students' handwriting within days of starting the digital workbook. When paired with the paper workbook, the students were able to return to the program at any time and refine those individual letters that proved to be difficult. The digital workbook is wonderful for those just learning to write. It not only strengthens eye-hand coordination, but provides the visual and verbal stimulation needed to hold interest and develop correct penmanship.

Jennifer, Handwriting Camp Tutor - Cincinnati, Ohio
